## Notes

1. The 3<sup>rd</sup> Wednesday of the month is still open and I am still looking for an NCS volunteer who can work the New Port Richey repeater at 146.670 MHz.
2. I am currently working on a plan to test the use of the 146.670 frequency in SIMPLEX mode. In the West Central Florida Communication Plan, this is the secondary backup for use if BOTH of the repeaters on 146.670 and 145.330 MHz fail. In preparing for this test, I will have a HOMEWORK (!!)
